

Changing the IP Address of the Kitchen Video System (KVS) Client

This document will walk you through the process of changing the IP address of the Kitchen Video System.

Changing the IP of the Kitchen Video System

Should it become necessary to change the IP of the Kitchen Video System, you should follow these steps.

1. Press the reset button on the LS6000 (right side of the front) while holding down the **Summary** button on the KVS.

You can release the **Summary** button when you hear a beep.

2. The setup screen for the LS6000 will appear on the monitor.

3. Select **In Progress** on the Bump Bar until **ETHERNET** is highlighted on the monitor.
4. Use the Bump Bar keypad to enter a new IP address. Select **Summary** to move between sections of the address.

5. Select **In Progress** until **EXIT** is highlighted.
6. Select  on the Bump Bar keypad twice to save the changes, exit setup, and restart the client.
