Software setup

To set up your kitchen video system to work with RPE, open RPE, select **Manager**, provide the requested credentials, and follow these steps.

|	
	1. Select **Setup** and then **Setup Screen**.
	2. Select the **Hardware** tab. 3. Select **Page 2**.
	4. Select **Start**.
	5. Select **Run…**

|	
Run ? X Type the name of a program, folder, document, or Internet resource, and Windows will open it for you. Open: cmd ▾ OK Cancel Browse...	6. Type "cmd" (without quotes) and select **OK**.
C:\WINDOWS\system32\cmd.exe Microsoft Windows XP [Version 5.1.2600] (C) Copyright 1985-2001 Microsoft Corp. H:\>ipconfig	7. Type "ipconfig" (without quotes) and press enter.
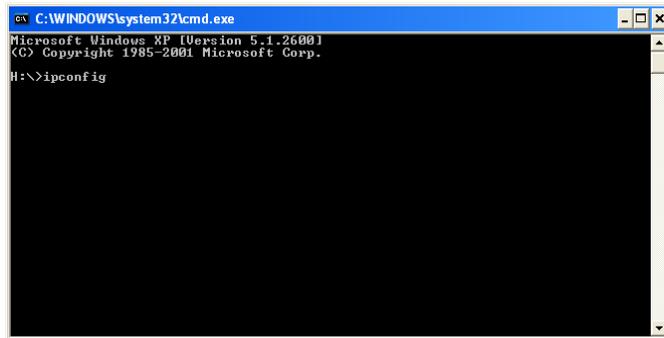

C:\WINDOWS\system32\cmd.exe

H:\>ipconfig
 	
Windows IP Configuration
 	
Ethernet adapter Local Area Connection:
 	
    Connection-specific DNS Suffix . : pcamericainc.local
    IP Address. . . . . : 90.0.0.109
    Subnet Mask . . . . : 255.255.255.0
    Default Gateway . . . . : 90.0.0.3
 	
H:\>
	8. Write down the local IP address of your computer. In this example, the address is **90.0.0.109**.

	9. Type this address where you are asked for **Server Address or Name**. • **Server Port:** - Enter the server port number the Bumpbar is communicating through (in most cases the port will be 42000). • **Send Items Immediately** - Selecting this option will send 1st item to Bump bar immediately after 2nd item is added to invoice screen. The Last item will be added to Bump bar when selecting Send or Pay from invoice screen. • **Show Station ID** - Selecting this option will display the station id from which the order was placed. 10. Select **Edit Bump Bars**.
	11. Select **Add**.

12. Provide an ID for the Bump Bar.

13. Provide the IP address of the Bump Bar client (see step 7 of the previous section).

14. Provide a name for the Bump Bar.

15. Decide how many panels (orders) and rows you would like displayed on the screen. The default values are typically used.

16. Choose the "Initial Late Order Color" by selecting **Choose Color** where indicated on the image to the left.

17. Provide the time past which orders will be displayed in this color.

18. Choose the "Secondary Late Order Color" by selecting **Choose Color** where indicated on the image to the left.

19. Provide the time past which orders will be displayed in this color.

20. Choose the "Tertiary Late Order Color" by selecting **Choose Color** where indicated on the image to the left.

21. Provide the time past which orders will be displayed in this color.

22. Choose the background color for order headers by selecting **Choose Color** where indicated on the image to the left.

23. Choose the foreground color for order headers by selecting **Choose Color** where indicated on the image to the left.

24. Select **Save All**.

25. Select **Exit**.

|	
Update	26. Select **Update**.
27. Exit completely out of RPE. 28. Reopen RPE. 29. Select **Manager** and provide the requested credentials. 30. Repeat steps 1-3 and 10.	
Setup BumpBar Routes	31. Select **Setup BumpBar Routes**.
Choose a route Double-click to select a route Create a New Route Modify Delete Select Cancel	32. Select **Create a New Route**.
Create a new route 1 : Kitchen double-click here Double-click to add the bumpbar to the current route Name this route: Remove Last Save Cancel	33. Double-click the bump bar that was just created.
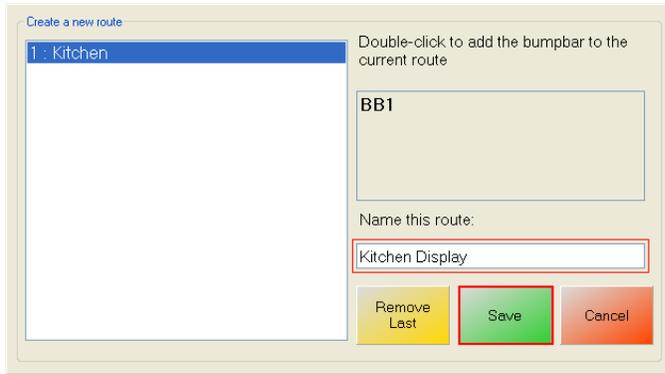

|	
	34. Name the route. 35. Select **Save**.
	36. Select **Cancel**.
	37. Select **Exit**.
	38. Select **Update**.
39. Exit completely out of RPE. 40. Reopen RPE.	
	41. Select **File** on the upper left-hand corner of the screen. 42. Move your mouse over **Order Filling**. 43. Select **Start Bumpbar Server**. **Note:** This option will only need to be checked on the station where the Setup Screen options were configured (this is the station acting as the Bumpbar Server).

|	
Restaurant Pro Express File Select Business Type Select Database Database Maintenance ▸ Store/Station Setup ▸ Order Filling ▸ ✓ Start Bumpbar Server Caller ID ▸ Start Bumpbar Client Security ▸ Touchscreen Order Filling	44. Repeat steps 41 and 42. 45. Select **Start Bumpbar Client**. **Note:** This option will need to be checked on all computers which you would like to send orders to. This may also include the computer acting as the Bumpbar Server.
46. Exit completely out of RPE. 47. Reopen RPE.	

## Setting up items to be sent to the kitchen video system

Before orders can be sent to the kitchen video system, items must be configured to use it as a "route". To do this, open RPE, select **Manager**, provide the requested credentials, and follow these steps.

	1. Select **Inventory Maintenance**.
	2. Select an item that you would like displayed on the bump bar upon being ordered. 3. Select the **Printers** tab. 4. Select **Add Route**.

|	
Choose a route Double-click to select a route Kitchen Display : BB1 Create a New Route Modify Delete Select Cancel	5. Select the route you created in steps 32-35 of the previous section. 6. Select **Select**.
Click to select: BumpBar Backcolor BumpBar Forecolor	7. Select a background and foreground color for this item on the bump bar.
Save	8. Select **Save**.

9. Repeat steps 2-8 for all items you would like sent to the bump bar.

10. Exit completely out of RPE.

11. Restart RPE.

**Using the kitchen video system and bump bar**

The following steps run through the functions of the kitchen video system and bump bar.

|	
	1. Ring up an item that was set up to be sent to the kitchen video system in the previous section. 2. Select **SEND**.
	3. The order will appear on the monitor. Note the number of the order within the kitchen video system.

4. Select **In Progress** and the number of the order (**1** in this case) on the Bump Bar when the order is being prepared. This will change the status of the order appropriately.
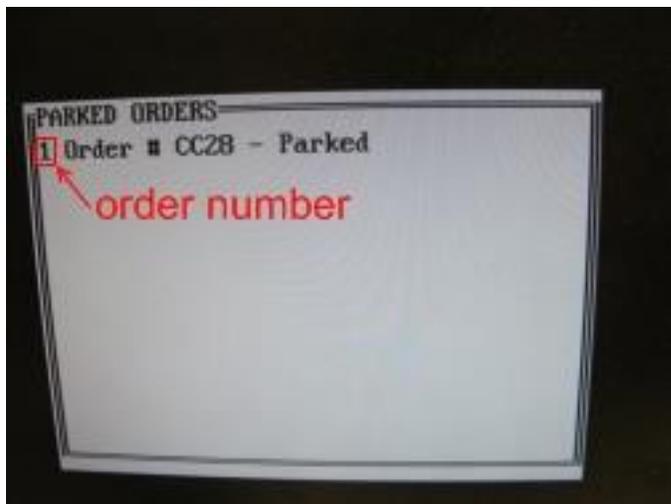

5. Select **Park/Serve** and the number of the order (**1** in this case) to park the order, or put it aside temporarily.

6. To bring the order back, select **Park/Serve** twice and then the number of the order (indicated on the image to the left).
	7. Select **Summary** to see a list of all items in the system.

8. When an order is complete, select its number (**1** in this case) to make it disappear from the screen.

9. If an order was mistakenly removed from the screen, select **Recall** to bring it back.

When orders have been on the screen for a certain amount of time, they will change colors in the manner specified earlier.

Show Station ID Enabled

When this option has been enabled then the orders will show on the bumpbar with the station ID in which the order was placed.
