
Price Check in Cash Register Express

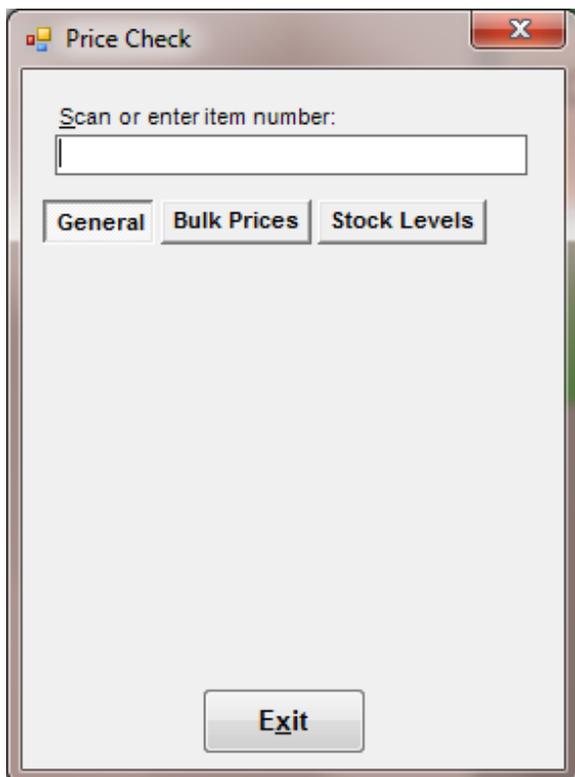

When doing retail sales customers often inquire about the price of your inventory. If the item is missing a price tag you can do a price check to find that items price and other important information.

Performing a Price Check

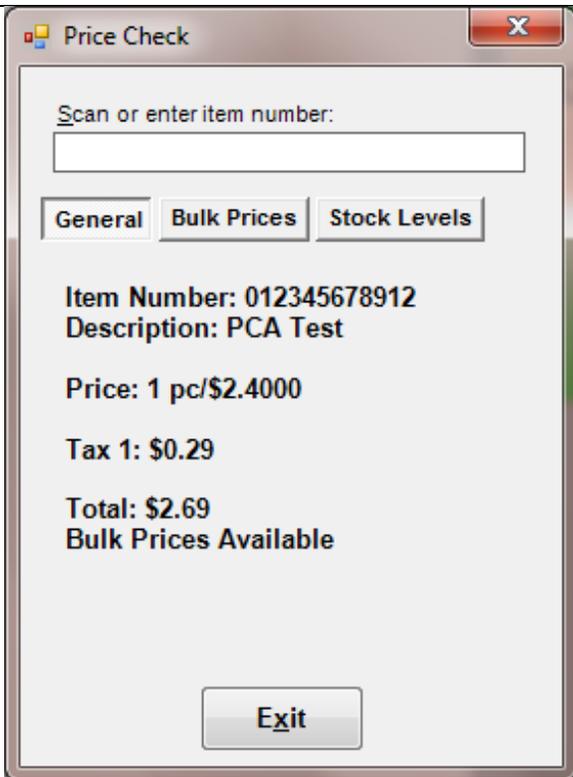

1. At the invoice screen select the **Price Check** button.

Note: Optionally you can select F5 on your keyboard which will also bring up the price check screen.

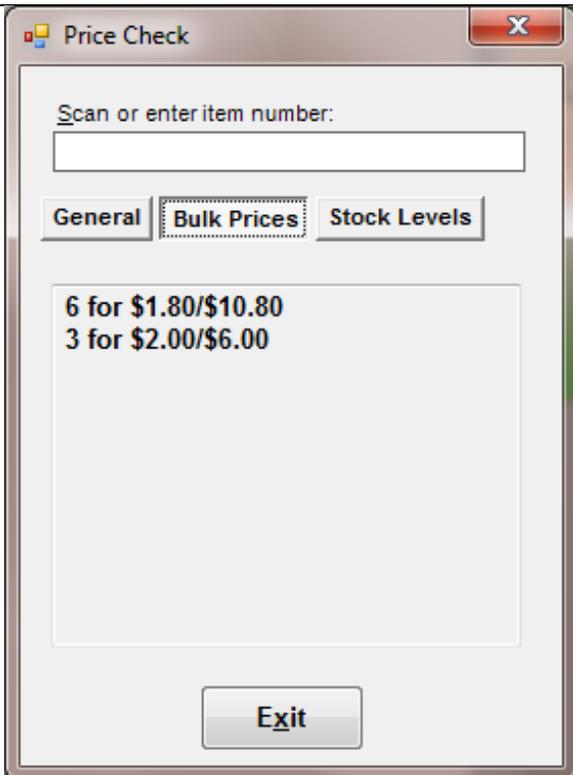

2. Scan the barcode of the item you would like to check the price of.

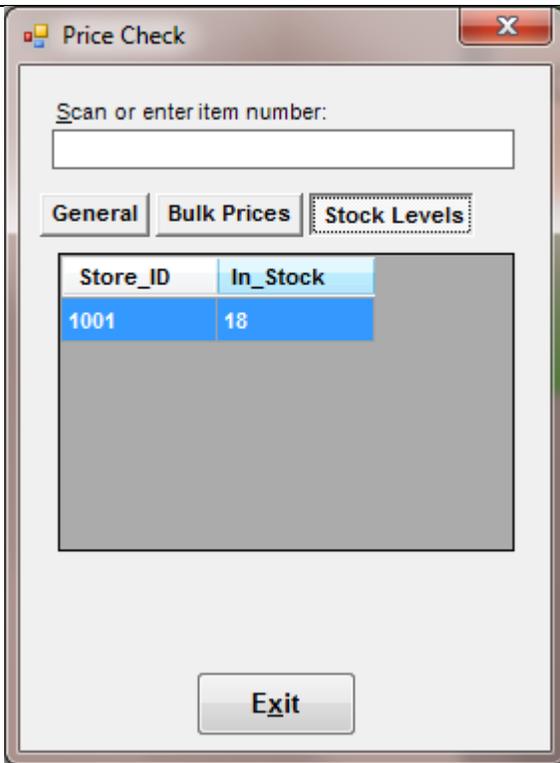

3. With the **General** tab selected the following information will be displayed:

- **Item Number**
- **Description**
- **Price**
- **Tax**
- **Total**
- Whether there are **Bulk Prices** setup for this item

4. With the **Bulk Prices** tab selected the following information will be displayed:

- Any **Bulk Prices** setup for this item under the **Special Pricing** tab of **Inventory Maintenance**.

5. With the **Stock Levels** tab selected the following information will be displayed:
 - Each **Store ID** associated with this database
 - The number **In Stock** of this item at each location
